# XIAOTIAN HAN

2808 CALDER AVE NE, APT 6146,
REDMOND, WA, 98052

919-638-8406
XIAOTIAN.SKY.HAN@GMAIL.COM

## SUMMARY

Applied Scientist with 5+ years professional experience in full Machine Learning life cycle.

## STRENGTHS AND SKILLS

- Tools: Pytorch, Azure (AzureML, COSMOS, Batch, etc), DeepSpeed, ONNX, ROS
- Languages: Python, C++, Javascript, Scala, Rust
- Expertise in problem-solving, model development and deployment.
- Passionate about new techniques, fast and continuous learner

## PROFESSIONAL DEVELOPMENT

### WORK EXPERIENCE

Senior Research Scientist, ByteDance Inc, Bellevue, USA — Aug. 2023 – Present

- Building Multi-modal Large Language Models.

Senior Applied Scientist, Microsoft Azure Cognitive Service, Redmond, USA — Sept. 2022 – Aug. 2023

- Collaborated with Schwarz group to define auto-checkout problem, evaluation metric and deployment criterial, collected bootstrapping dataset, finetuned Project Florence foundation model, deployed model, set up automatic feedback data collection and continuous model finetuning. Achieved 1st customer success with Florence foundation model.
- Built Florence foundation model customization service.

Applied Scientist II, Microsoft Azure Cognitive Service, Redmond, USA — May. 2020 – Sept. 2022

- Implemented common Scene Graph Detection algorithms for benchmarking, proposed a new architecture, and achieved SOTA on Visual Genome, Open Images and GQA VRD tasks. Extracted features for VinVL.
- Built and maintained Azure Kinect Body Tracking model evaluation benchmark, compressed body tracking model and implemented cloud inference pipeline.
- Deployed RGBD multi-camera system in lab environment, built RGBD2RGB automatic annotation system, arranged external actors for data collections. Host multi-camera tracking workshop in ICCV2021.
- Led vendors collect and annotate large scale retail store products on shelf datasets as internal benchmarks for CPG vertical. Pretrained a dense object detector for universal product detection, achieved SOTA on SKU110k and Retail50k.
- Built unified pipeline for synthetic data generation and model training for shelf product detection.

Applied Scientist, Microsoft Bing Multimedia, Redmond, USA — Jul. 2019 – May. 2020

- Trained and deployed Fashion and Home Furniture Object Detection Model for Bing Visual Search (example).
- Implemented single object tracking prototype running on mobile devices in Bing app (**link**).
- Optimized Bing image search recommendation to increase user engagement with sematic similar images. Pretrained image feature extraction model using contrastive loss with Bing index images.
- Collaborated to develop MagGAN for changing fashion attributes. The model was used for Bing visual search image query reformulation. Defined metric and measurement set, set up UHRS with A/B testing for evaluation.

Research Intern, Kwai, Seattle, USA — Feb. 2019 – Jul. 2019

- Led the project of DouDizhu Poker endgame. Implemented MiniMax Tree Search solver with caching to serve million users. Worked with production team to integrate feature into mobile game app (**link**). Built an online active learning system to help game designers generate poker endgames with real-time playing feedback.
- Initiated DouDiZhu Reinforcement Learning research in Kwai. Implemented RL Poker simulator. Experimented with Counterfactual Regret Minimization, contributed to DouZero (**link**).

Research Intern, Tencent, Shenzhen, China — May. 2018 – Aug. 2018

- Implemented graph Effective Closeness algorithm in Angel-ML. (**link**)
- Implemented Markov Clustering Algorithm with Spark. Approximated 200M×200M matrix multiplication by Monte Carlo Random Walk with 40% speed up. Won Tencent Micro Innovation Award.
- Implemented Multiplex Network Embedding on *Honor of Kings* social network for user friendship prediction.

### PAPERS

- Han, Xiaotian, et al. "*CORE-MM: Complex Open-Ended Reasoning Evaluation For Multi-Modal Large Language Models*. (**link**)
- Han, Xiaotian, et al. "*MMPTRACK: Large-scale densely annotated multi-camera multiple people tracking benchmark.*" Proceedings of the IEEE/CVF Winter Conference on Applications of Computer Vision. 2023. (**link**)

- Han, Xiaotian, et al. "*Image scene graph generation (sgg) benchmark.*" arXiv preprint arXiv:2107.12604 (2021). (**link**)

## EDUCATION

| | |
|---|---|
| M.S. in Computer Engineer, Duke University | Aug. 2017 – Dec. 2018 |
| B.S. in Computer Science, University of Science and Technology of China | Aug. 2013 – Jul. 2017 |
| B.S. in Physics, University of Science and Technology of China | Aug. 2013 – Jul. 2017 |
